Application/Control Number: 10/803,576

Art Unit: 1795

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

Page 2

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-3, 10-12 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the means for contacting/decreasing of claim 1 comprising means for applying a voltage to the nanostructures, does not reasonably provide enablement for any other means for contacting/decreasing. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. (New Rejection)

Applicant has support for the means for contacting/decreasing in the present specification comprising means for applying a voltage to the nanostructures. Applicant has support for no other means for contacting/decreasing and so claim 1 must be amended to recite this means for contacting.

Claims 2-3 and 10-12, dependent on claim 1, fall therewith.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kawanami et al. show utilizing a voltage to change the tension in an electrolyte in a display element of interest while Kroupenkine et al. disclose applying a voltage to nanostructures to cause electrolyte to penetrate to a surface of an electrode.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 571-272-1287. The examiner can normally be reached on Monday-Friday, 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
